

Derbyshire County Council's failure to satisfactorily maintain Willington's pavements in a safe condition.

---

To WPC Chair via Clerk

In an e-mail to WPC last February, I referred to the unsatisfactory condition of St Michael's Close pavements - which apart from a tar slurry wash about 30 years ago, and from occasional local patching by utility companies, has received no maintenance in the past half century. The unsatisfactory condition remains, unresolved.

In the February e-mail I questioned, "Can I ask the WPC to confirm through our County Councillor that no planned maintenance is to be made to SMC's pavement during the next year?" (i.e. year 2022-23)

So far as I am aware my question remains unanswered. Can you arrange to provide a response, please?

Kind regards

---
